## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 11-14, drawn to a method of treating photosensitization in a patient in need thereof.

Group II, claim(s) 15-16 and 18, drawn to a method of inhibiting proliferation in cells via cellular contact.

Group III, claim(s) 17, drawn to a method for inhibiting cellular secretion of cytokines IL-6 and IL-8 via irradiating cells with UV light followed by cellular contact.

Group IV, claim(s) 18, drawn to a method of treating psoriasis in a patient in need thereof.

Group V, claim(s) 19, drawn to a method for inhibiting plasma fibrinogen in a patient in need thereof.

Group VI, claim(s) 20, drawn to a method for reducing Apolipoprotein B/Apolipoprotein A-1 quotient in a patient in need thereof.

Art Unit: 1654

The inventions listed as Groups I-VI do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The special technical feature of each inventive Group is providing a particular functional effect (which is different and distinct from the functional effect of the other Groups) to a patient or to cells in need of the particular functional effect which is not shared by the other Groups. Accordingly, the special technical features of these independent methods do not correspond since these methods are not disclosed as capable of use together, they have different modes of operation, they have different functions, and they have different effects. One would not have to practice the various methods at the same time to practice just one method alone.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
